

# CORRO-SPRAY

A SPECIAL WIRE SPRAY GUN FOR CORROSION PROTECTION.

## TYPICAL SPRAY RATES:

Material	Size	lbs per hour
Aluminum	3/16"	14
	1/8"	12
Babbitt	3/16"	128
	1/8"	55
Tin	1/8"	70
Zinc	3/16"	61
	1/8"	45

**CORRO-SPRAY** wire metallizing gun is specially designed for high speed spraying of coatings of Zinc, Zinc-Aluminum and Aluminum for corrosion protection. It is also suitable to spray Tin and Babbitt which are low melting point materials. This gun has very high pulling power due to the special design of the air turbine. An additional feature in this gun is its thumb operated pneumatic wire feed stop and start control. It can be easily converted to spray wire diameters of 5/32" and 3/16". This gun, however cannot be used for hard materials with high melting points.
