

# WIREJET- 96

## 12E Equivalent Combustion Wire Spray Gun

### Typical Spray Rates (Lbs/Hr)

High Speed (Acet):		
Aluminum	3/16"	16
	1/8"	13
Babbitt	3/16"	185
	1/8"	90
Tin	1/8"	95
Zinc	1/8"	45
Standard Speed (Acet):		
Aluminum	3/16"	14
	1/8"	12
<b>BONDRITE</b>	1/8"	8
Alum-Bronze	3/16"	19
	1/8"	15
Stainless	3/16"	16
	1/8"	13
Zinc	3/16"	65
	1/8"	32

The Plasma Powders **WireJet 96** wire metallizing gun's design allows it to be used for both high and low speed applications with a simple gear change. Numerous accessories increase its versatility including various Extensions and Air Cap, Nozzle and Siphon plug configurations to provide exceptional coating quality and economical operation. Separate wire feed/air-gas controls keep wire from cooling and jamming in the nozzle when wire feed is temporarily stopped, reducing maintenance, material waste and lost production time to clear jams. It runs on either Acetylene or Propane/Propylene fuel gas. Wire sizes range from 1/16" to 3/16".
