

WIREJET- 98

14E Equivalent Combustion Wire Spray Gun

Typical Spray Rates (Lbs/Hr)

<u>High Speed (Acet):</u>		
Aluminum	3/16"	16
	1/8"	13
Babbitt	3/16"	185
	1/8"	90
Tin	1/8"	85
Zinc	3/16"	97
	1/8"	86
<u>Standard Speed (Acet):</u>		
Aluminum	3/16"	14
	1/8"	12
BONDRITE	1/8"	8
Alum-Bronze	3/16"	19
	1/8"	15
Stainless	3/16"	16
	1/8"	13
Zinc	3/16"	65
	1/8"	32

The Plasma Powders **WireJet 98** wire metallizing gun's design allows it to be used for both high and low speed applications with a simple gear change. This versatile gun has a convenient wire feed thumb trigger making it an excellent choice for hand-held use. A separate valve handle controls air and gas flow which helps keep wire from cooling and jamming in the nozzle when wire feed is temporarily stopped, reducing maintenance, material waste and lost production time to clear jams. It runs on either Acetylene or Propane/Propylene fuel gas. Wire sizes range from 1/16" to 3/16".
