

## Tube Mill Re-Metalizing Enclosure

### PPS Tube Mill Re-Metalizing enclosure

The basic **Cabinet** includes a front swing door with shaded view glass, torch opening, line pass-through opening and dust collection flange. Options include a tough **Ceramic liner** to help with interior maintenance and an adjustable remote operated **Motorized Mount** for your coating equipment.

These enclosures help limit **Dust, Noise** and **Arc flash**. The remote-controlled torch mount makes coating equipment maintenance easier to manage by moving the entire spray gun assembly up and out of the cabinet.

**Each enclosure is built to specification.**
